NORTHWIND SALES PERFORMANCE

Interactive Sales Dashboard
Business Insight Report

Prepared by	D.D. Nandhakumaran
Course	B.Com FAI
Date	9 October 2026
Report focus	Orders, Sales, Quantity, Freight, Customers, Category, Country & Employee Performance

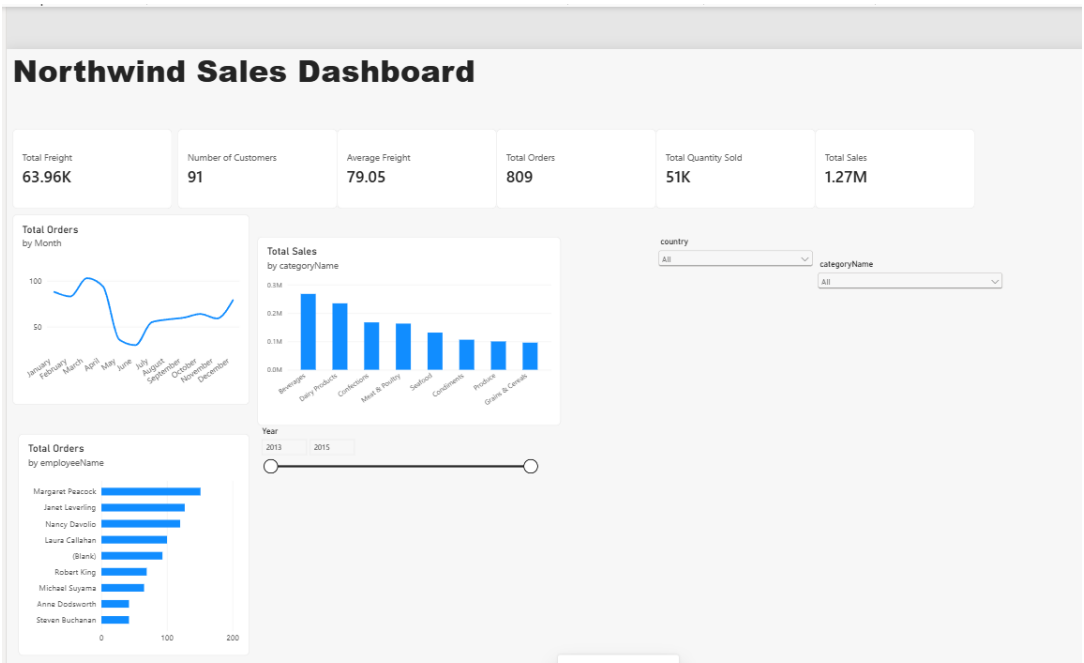

Figure 1. Northwind Sales Dashboard.

1. Introduction

The Northwind Sales Dashboard presents an interactive view of business performance using key order, sales, quantity, freight and customer measures. The dashboard combines KPI cards, a monthly order trend, category sales, employee performance and customer and product analysis in one visual interface.

2. Dashboard Overview

The dashboard contains six headline KPI cards: Total Freight, Number of Customers, Average Freight, Total Orders, Total Quantity Sold and Total Sales. The charts show orders by month, sales by category, orders by employee and customers by country. A product-level table provides sales and quantity details.

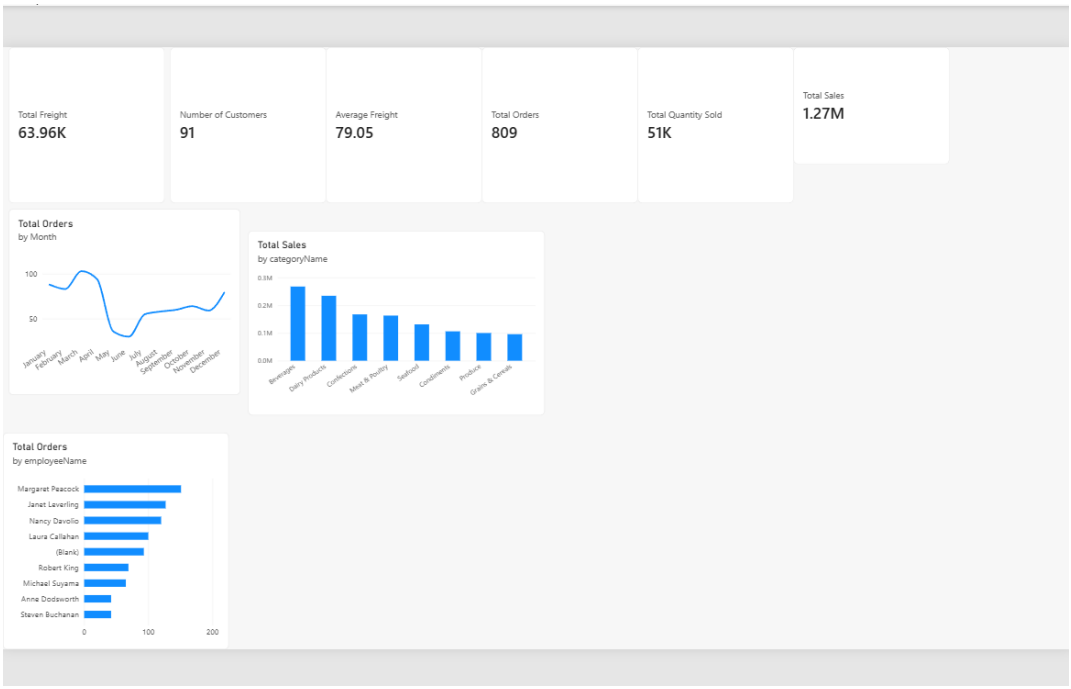

Figure 2. KPI cards, monthly orders, category sales and employee orders.

3. KPI Analysis

The values visible in the supplied screenshots are summarised below.

KPI	Displayed value	Interpretation
Total Freight	63.96K	Total shipping cost associated with orders.
Number of Customers	91	Distinct customers who placed orders.
Average Freight	79.05	Average freight charge per order.
Total Orders	809	Total number of orders shown.
Total Quantity Sold	51K	Approximately 51 thousand units sold.
Total Sales	1.27M	Overall sales value; product table total is 1,265,793.04.

The KPI cards provide a quick summary of the overall operational and financial position. Total sales are approximately 1.27M, while the product table records 51,317 units sold.

4. Category Sales Analysis

Beverages is the leading category at roughly 0.27M, followed by Dairy Products at about 0.23M. Confections and Meat & Poultry follow at roughly 0.17M and 0.16M. Seafood, Condiments, Produce and Grains & Cereals are each between about 0.10M and 0.13M.

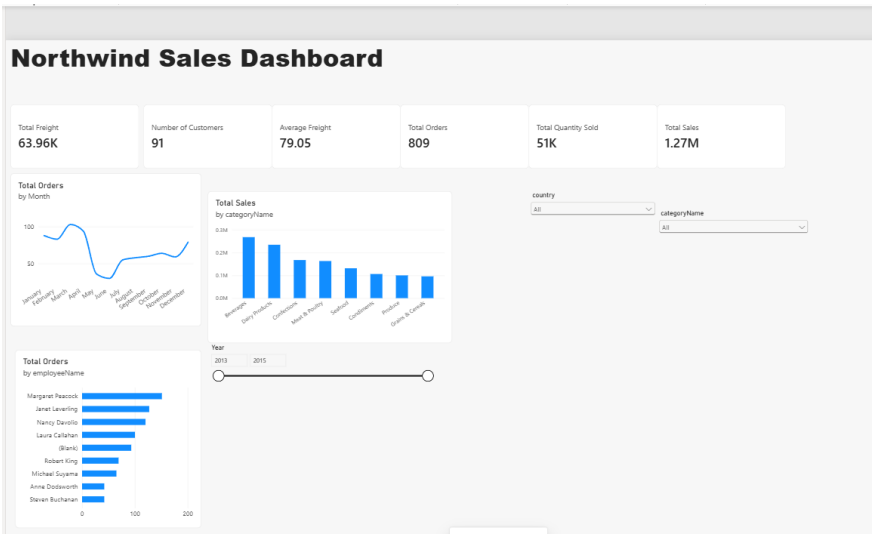

Figure 3. Category sales and dashboard filters.

5. Monthly Order Trend Analysis

The Total Orders by Month line chart shows orders are strong from January to April, then fall sharply around May and June. Orders recover through the second half of the year and rise again in December. The Year filter should be considered when interpreting the low May and June values.

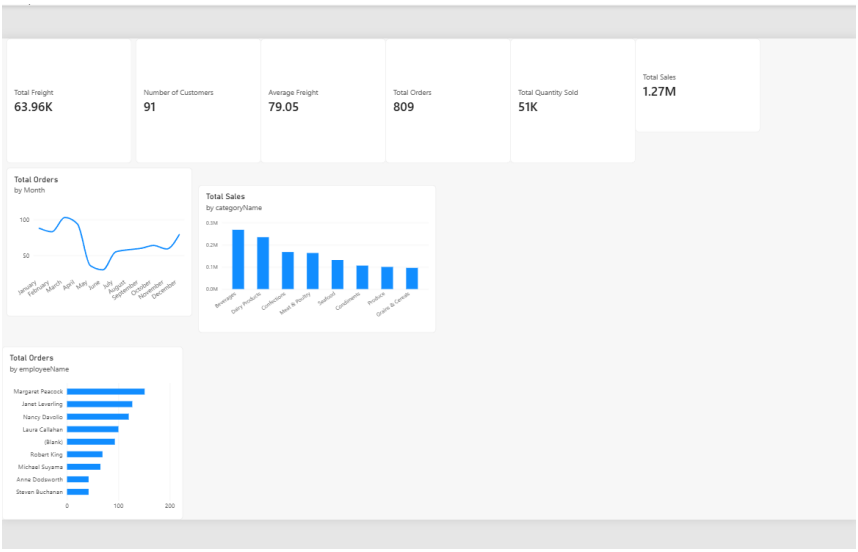

Figure 4. Total orders by month.

6. Employee Performance Analysis

The employee chart compares order counts by employee. Margaret Peacock appears at the top, followed by Janet Leverling and Nancy Davolio. The chart helps compare workload and identify differences in order handling.

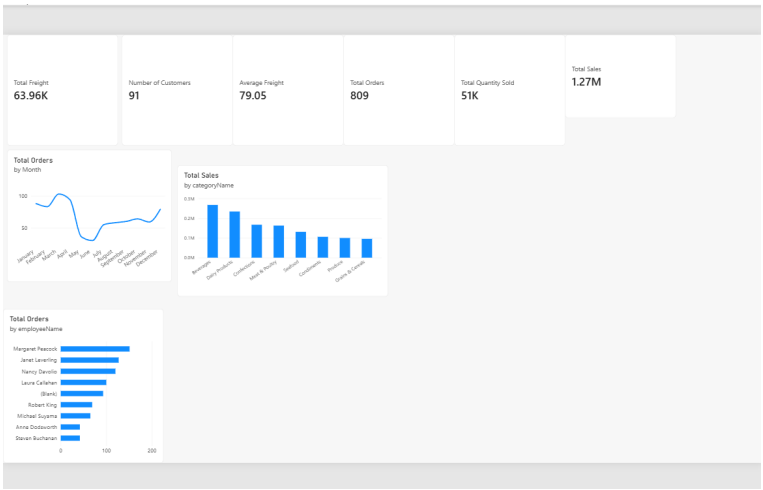

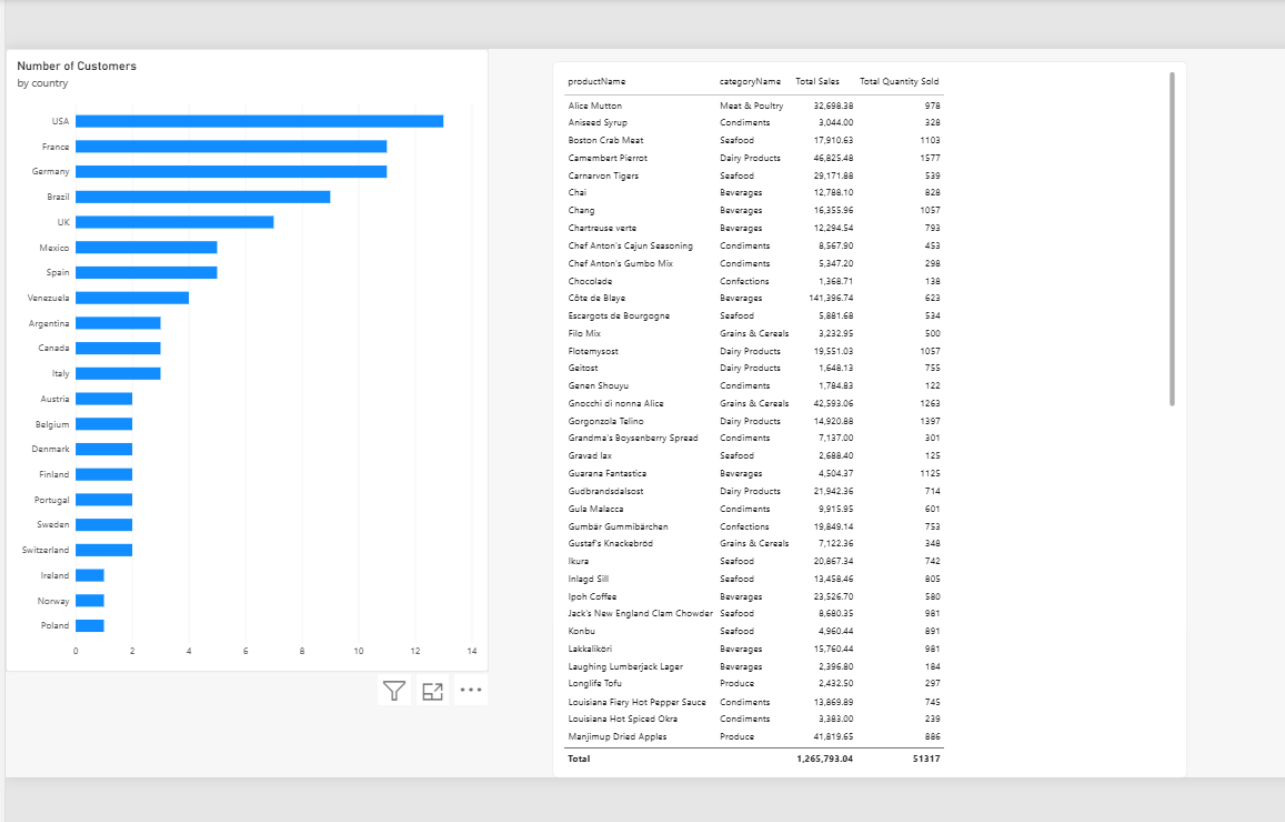

Figure 5. Total orders by employee.

7. Customer Analysis by Country

The country chart shows customer counts across multiple countries. The USA has the most customers, followed by France and Germany, then Brazil and the UK. These leading countries represent a substantial share of the customers shown.

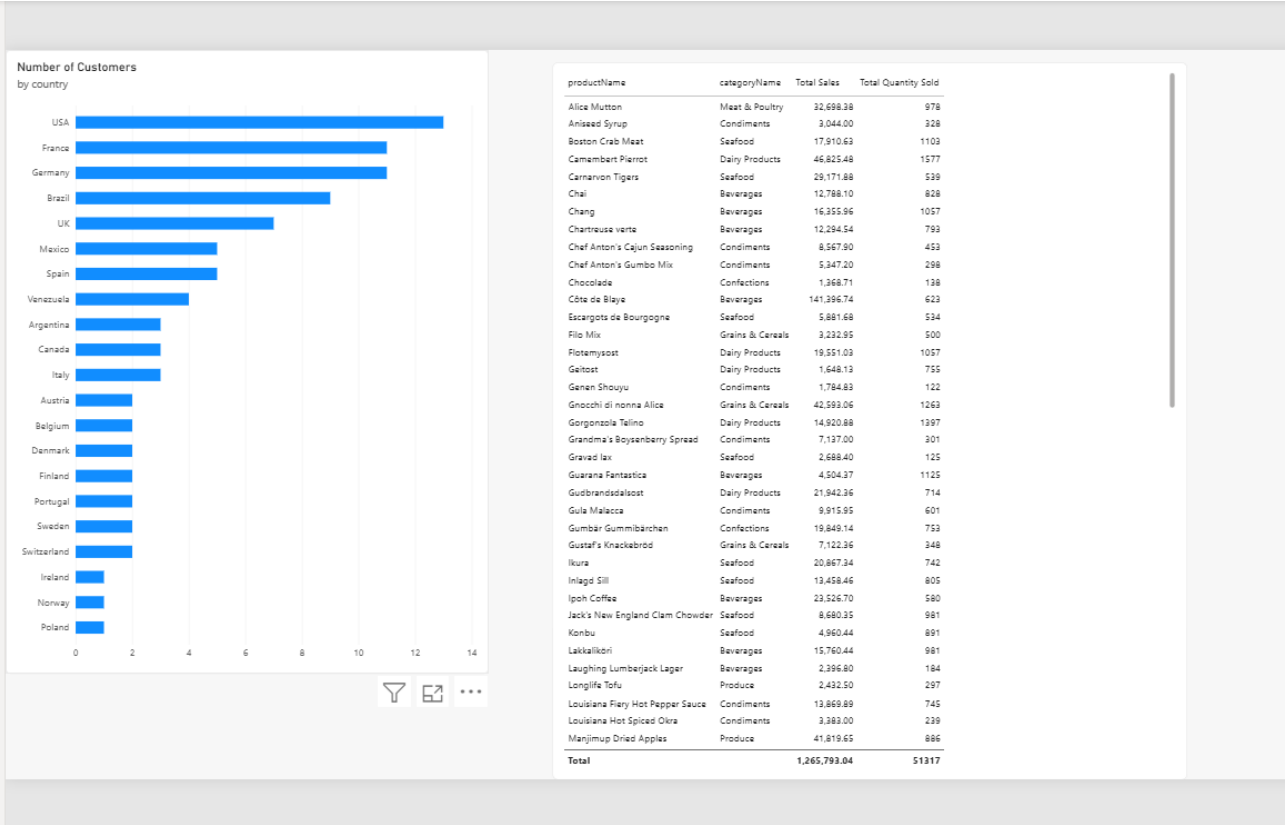

productName	categoryName	Total Sales	Total Quantity Sold
Alice Mutton	Meat & Poultry	32,698.38	978

Total		**1,265,793.04**	**51317**

Figure 7. Product-level sales and quantity table.

9. Interactive Filters and Dashboard Use

The dashboard provides a Year range slider and Country and categoryName drop-down filters. These controls let users narrow the analysis to a selected period, country or product category and see how the KPI cards and charts change.

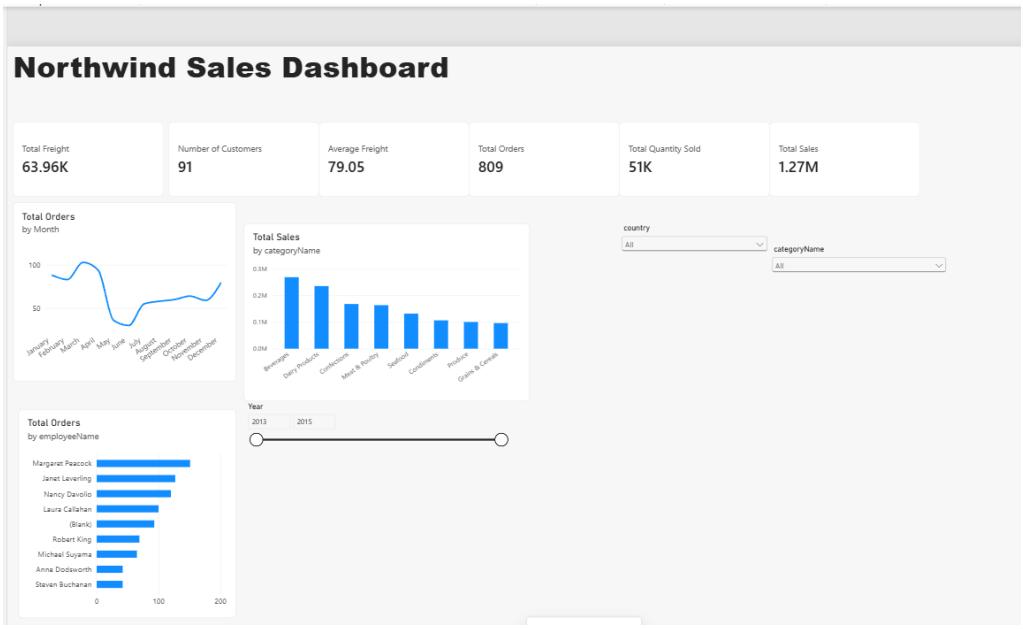

Figure 8. Year slider and Country / Category filters.

10. Key Business Insights

1. The business records 809 orders and 1.27M in sales from 91 customers, with about 51K units sold.
2. Beverages and Dairy Products are the strongest categories.
3. Orders vary by month, with a visible drop around May and June.
4. Employee order counts are uneven, with Margaret Peacock leading the chart.
5. Customer counts are concentrated in a handful of countries.
6. Côte de Blaye is a major contributor among the products visible in the table.

11. Recommendations

• Focus inventory and marketing on Beverages and Dairy Products, and investigate why lower-performing categories lag behind.
• Prepare stock and staffing ahead of the stronger months, and consider promotions during weaker months.
• Review employee workloads and set fair performance targets.
• Protect key customer countries and run campaigns in countries with fewer customers.
• Monitor high-selling products and review low-selling items.
• Monitor freight cost regularly and look for cost-effective shipping options.

12. Conclusion

The Northwind Sales Dashboard provides a compact and interactive method for understanding business performance. The supplied screenshots show 809 orders, 1.27M in sales, approximately 51K units sold and 91 customers. The combination of KPI cards, monthly, category, employee, country and product views supports sales planning, product prioritisation, customer analysis and shipping cost control.
